

ROHIT SURYAWANSHI

Software Developer | Python Full Stack Developer

Pune, Maharashtra, India | rohitsuryawanshi775682@gmail.com | +91-7756822035 | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Software Developer and Python Full Stack Developer with hands-on experience building AI-driven web applications using React.js, Node.js, Express.js, MongoDB, and Python-based machine learning frameworks (TensorFlow, Keras, OpenCV, Scikit-learn). Skilled in end-to-end software development, including REST API design, database architecture, and deployment of production applications on Vercel and Render. Completed an AI/ML virtual internship at Infosys Springboard, applying computer vision and deep learning to real-world defect detection problems. Strong foundation in Data Structures and Algorithms (DSA) and Object-Oriented Programming (OOP), with active practice on LeetCode.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, JavaScript
- **Web Technologies:** React.js, Redux, Next.js, Node.js, Express.js, REST APIs, Tailwind CSS, HTML5, CSS3
- **Machine Learning / AI:** TensorFlow, Keras, OpenCV, Scikit-learn, CNN, EfficientNetB0, Computer Vision, Deep Learning
- **Databases & Cloud:** MongoDB, Supabase, Vercel, Render, Git, GitHub
- **Developer Tools:** VS Code, Android Studio, IntelliJ IDEA, Cursor, Postman
- **Core Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Full Stack Development, Agile Development, API Integration

EXPERIENCE

AI/ML Virtual Intern | Infosys Springboard

Feb 2026 – Apr 2026

- Developed an AI/ML-based system for PCB (Printed Circuit Board) defect detection using image processing and deep learning, improving detection accuracy over manual inspection methods.
- Collaborated in a remote virtual internship program, applying computer vision fundamentals to a real-world manufacturing quality-control use case.

PROJECTS

Smart Crop Advisory System (AgriSmart) — Full Stack AI Web Application

Apr 2026

Live Demo Available

Technologies: React.js, TensorFlow, OpenCV, CNN, Scikit-learn, Supabase

- Developed an AI-based smart agriculture advisory web platform for crop recommendation, plant disease detection, and fertilizer guidance.
- Implemented deep learning and machine learning models (CNN-based image classification) to deliver accurate agricultural predictions.
- Integrated Supabase authentication, real-time database management, multilingual support, and an admin analytics dashboard for monitoring platform usage.

PCB Defect Detection System — Machine Learning & Computer Vision

Feb 2026 – Apr 2026

Personal Project

Technologies: Python, TensorFlow, Keras, OpenCV, EfficientNetB0, React, TypeScript, Node.js, Express, MongoDB, Tailwind CSS

- Built an AI-based system to automatically detect and classify defects in printed circuit boards using computer vision and deep learning.
- Applied image preprocessing techniques — ORB feature matching, image subtraction, Otsu thresholding, morphological operations, and contour detection — for precise defect localization.
- Trained a CNN using EfficientNetB0 (transfer learning) with TensorFlow/Keras to classify detected defects with high accuracy.
- Built a full-stack web application (React, TypeScript, Node.js, Express, MongoDB) for image upload and result visualization; deployed frontend on Vercel and backend on Render.

CERTIFICATIONS

- Python Developer — freeCodeCamp
- Database Management System — NPTEL
- Full Stack Development — Udemy
- Introduction to Machine Learning with Scikit-learn — Udemy
- Java Programming — NPTEL

EDUCATION

Bachelor of Technology, Computer Science and Engineering

Aug 2023 – Aug 2027

MGM's College of Engineering, India

- CGPA: 7.5 / 10

Higher Secondary Certificate (HSC)

Jun 2020 – Mar 2022

Kusumtai Jr. College, Nanded, India

- Score: 65%
